

## Introduction Sheet: Mobile Industrial Robots

**Mobile Industrial Robots** is a leading manufacturer of collaborative mobile robots. We are dedicated to developing user-friendly, flexible and safe robots to help companies increase the efficiency of their operations.

Our autonomous robots are a new generation of advanced mobile robots which give you a rapid return on investment, often with a payback period of less than a year.

These unique, collaborative robots are now used by manufacturers in a wide range of industries and healthcare sectors to automate their in-house transportation.

As a first mover in the field, we have enjoyed a rapid, worldwide adoption of our unique and innovative robots.

Mobile Industrial Robots is an international and ambitious company, having dedicated employees who are passionate about making a difference and creating success and innovation within the world of robotics.

We are represented worldwide with branch offices and through an extensive distributor network which are dedicated and delighted to receive your inquiry and support you.
