INTERNATIONAL BUSINESS CONNECTING

## Introduction Sheet: State of Green

State of Green is a not-for-profit, public-private partnership from Denmark. We foster relations with international stakeholders interested in discussing their challenges and bring into play relevant Danish competencies and technologies that enable the green transition.

As your one-point entry to Danish businesses, governmental and academic institutions, experts, and researchers, State of Green connects you with all leading Danish players working to drive the global transition to a sustainable, low-carbon, resource-efficient society. Whether it be within renewable energy, energy efficiency, water management, waste management, climate adaption or integrated urban solutions, we can match you with the partners and solutions you need. Our goal is to support your role in the global green transition in the most optimal way.

### Collaboration and dialogue

Rather than advocating a one-size-fits-all model for the green transition, State of Green wishes to actively help solve global challenges. We seek to stimulate debate, spur partnerships and inspire others through leading by example. Collaboration and dialogue are central elements of the Danish mind-set. For decades, we have facilitated partnerships and relations across sectors and government levels to achieve sustainable growth.

State of Green is in itself an example of partnership and collaboration. We are a not-for-profit, public-private partnership between the Danish Government and Denmark's four leading business associations: Confederation of Danish Industry, the Danish Energy Association, the Danish Agriculture & Food Council and the Danish Wind Industry Association. His Royal Highness, Crown Prince Frederik of Denmark, is the patron of State of Green.

In short: If you are looking for inspiration, dialogue or partnership, State of Green welcomes you.
