INTERNATIONAL BUSINESS CONNECTING

Introduction sheet: Cleantech Center

As a cluster, the Cleantech Center is the sustainable innovation center of and for the Eastern Netherlands. We bring entrepreneurs, education and government together and realize concrete business cases to apply Cleantech. By initiating, connecting, driving and doing. With the aim of reducing waste, fewer CO2 emissions and more jobs.

Why

It is evident that innovative clean technology must be used on a large scale. Life on earth is increasingly threatened. Mankind has one planet. There must be a balance between what we want and what the earth can handle. Now and in the future. The Cleantech Center wants to make a recognizable contribution to this.

How?

Specifically, we contribute to this by connecting, challenging and allowing knowledge institutions, companies, governments and residents in the east of the Netherlands for the actual implementation of Cleantech initiatives. We are also pragmatic and result-oriented.

What?

Together we realize concrete business cases to apply Cleantech. We connect the knowledge, inspiration and powers of sober doers from the east and ensure that more young people choose a career in the Cleantech. In order to realize less waste, fewer CO2 emissions and more (cleantech) jobs.

The Cleantech talent award is an initiative of Cleantech Center supported by Cleantech Regio.
