INTERNATIONAL INNOVATIONS ORIENTATION

Introduction sheet: Norbo Robotics

"At Nordbo Robotics we bridge human skills with robot precision allowing humans to be creative, and robots – repetitive" . Leo Zhou - CEO, Nordbo Robotics

Nordbo Robotics is an AI and robotics company. Specialized in No Code software for robotics within industrial manufacturing.

At Nordbo Robotics, passion, innovation, collaboration, and learning are a part of everything we do, and every decision we make. Collaborating with colleagues from different backgrounds is what makes us stronger and best prepared to meet our business goals.

Mimic Kit

Everyone can record and automate tasks with no prior programming experience. You simply use Mimic to record, transfer, and replicate your own movements. By letting the craftsman teach his or her skills to the robot, it is possible to preserve the handmade finish in various automated processes.

Mimic is a position sensing technology-centric platform for a wide range of applications: From a point teaching for inspections or pick and place applications to highly complex and smooth robot movements for painting and dispensing.
